ACKNOWLEDGEMENT

The internship opportunity I had with The Sparks Foundation was a great chance for learning and professional development. Therefore, I consider myself as a very lucky individual as I was provided with an opportunity to be a part of it. I am also grateful for having a chance to meet so many wonderful people and professionals who led me though this internship period.

Bearing in mind previous I am using this opportunity to express my deepest gratitude and special thanks to the Mr. Jay Sheety in spite of being extraordinarily busy with his duties, took time out to hear, guide and keep me on the correct path and allowing me to carry out my project at their esteemed organization and extending during the training.

It is my radiant sentiment to place on record my best regards, deepest sense of gratitude to Ms. Radhi Devlukiya for their careful and precious guidance which were extremely valuable for my study both theoretically and practically.

ABSTRACT

The whole purpose of this training was to learn and interact with the working industry in the major IT sector and to get an exposure on how are real life projects really handled by industries.

At the early stage, my main task was just to observe and learn how the python is used for data science project. .

This led me to learn about the program interface and how to read complex data, clean data and make dashboard. I have learned to make model that can run on many different platforms, such as Windows or Mac OS.

At the end after learning all the basics I was assigned a project related to Exploratory data analysis, which I completed very well that leads to the end of my internship.
